EXPERIENCE

Software Engineer Intern

Flintec Transducers (Pvt) Ltd

📅 Jun-Dec 2024 ⚙ Katunayake, Sri Lanka

Developed an Issue Management System, reducing resolution time by 60%, automating workflows, and improving collaboration using C#, ASP.NET Core MVC, SQL.

Software Engineer Trainee

ACPT Institute

📅 Jan-Jun 2024

📍 Wadduwa, Sri Lanka

Gained experience in full-stack development, including coding, testing, debugging, and developing web and mobile applications using Java, SpringBoot, JavaScript, React.js, React Native, HTML, CSS

PROJECTS

Mathru AI(Final Project)

📅 2025 ⚙ Open University

🔗 [Github Link](#)

Mathru AI is an AI powered maternal health system that provides personalized guidance for pregnant women and connects them with midwives for expert support and care using RAG(Retrieval Augmented Generation) and machine learning.

Banking Web Site - Prajashakthi Anuradhapura

📅 2025 ⚙ Anuradhapura, Sri Lanka

🔗 [Private Repository](#)

Developed a banking website for Prajashakthi Anuradhapura with admin panel to manage loan and bank details, event highlights and contributions using React.js, Spring Boot, SQL and VPS hosting.

Goods Outwards System

📅 2025 ⚙ Katunayake, Sri Lanka

🔗 [Private Repository](#)

Developed the system which handle the goods outward process and gain access control for different type of users. Technologies: ASP.NET Core MVC, C#, Bootstrap, MS SQL

Issue Management System

📅 2024 ⚙ Katunayake, Sri Lanka

🔗 [Private Repository](#)

Developed the system which handles and displays issues occurred in production lines under four categories using ASP.NET, C#, Bootstrap, MS SQL, Raspberry PI, MVC

CC1w-V2-wifiboardTest

📅 2024 ⚙ Katunayake, Sri Lanka

🔗 [Github Link](#)

Developed the system which handles and displays Multimeter with CC1W-V2 board and checking resistor values using ASP.NET Web Forms, C#, MS SQL

KidzKindle Donation Web Site

📅 2024 Personal Project

🔗 [Github Link](#)

This website is built for children. This is similar to an e-commerce web site and users can donate money as well as select products and add them to a cart like in an e-commerce website. Technologies: MERN stack

T2T Trace Program - Nagarro

📅 2024 ⚙ Nagarro Company

🔗 [Private Repository](#)

This is the first project given to us by Nagarro and our project is to build a book store Web site. Technologies: MERN stack

EDUconnect Web Application

📅 2023 ⚙ Open University

🔗 [Github Link](#)

Developed EDUconnect, an educational web app for course tracking, community discussions, notifications and settings using React, Bootstrap, PHP, SQL, Firebase.

MediME Android Mobile Application

📅 2023 ⚙ Open University

🔗 [Github Link](#)

Medical reminder app including reminder alarm, temperature, walking steps counter, google map, multimedia section using android studio (java, mysql database)

SUMMARY

I am a highly motivated and dedicated IT enthusiast currently pursuing a Bachelor Of Software Engineering Honours at Open University. With handson experience in software development, I am looking to apply my skills and learn new technologies. Passionate about problem-solving, writing clean and efficient code, and contributing to software solutions. I work well in a team and always strive to improve my technical knowledge.

EDUCATION

Bachelor of Software Engineering Honours

2021 – 2025

GPA - 3.3 (Present)

The Open University Of Sri Lanka

Successfully Completed High School examinations

2011 – 2019

H/Rajapakshe Central College Weeraketiya

CERTIFICATIONS

- SLASSCOM: Fundamentals Track, Software development Track and Customer Service Track of Future Careers Bridge
- University Of Moratuwa: Web Design for Beginners & Python for Beginners

SKILLS

Java ASP .NET C# React JS

Spring Boot JavaScript RAG AI

React Native Express Js

Vector Databases JWT

Laravel MS SQL SQL NEXT JS

HTML / CSS / Bootstrap Raspberry Pi

Mongo DB FireBase Git/ GitHub

AWS Azure VPS Hosting
